

Lafayette Sept 28th 1851

Friend Bush

Per Steamer I send you with this letter three mamoth peaches from the orchards of James Ramage of North Yamhill. They are merely above the average of the produce of a tree upon which there are some bushels of the same sort. Their aggregate weight is one lb five oss avdps. Two of them measure nine inches in diameter each, and the thrid nine and a half. If anyone can beat that let them speak out.

Enclosed you will find a communication in reference to C. Walker, and treaty matters. There are plenty of good men will swear to those charges, and as for character there is not a half breed in the country, but what receives and is entitled to more respect than Walker.

You can do as your better judgment dictates. I think I am certain of one thing that you will not be the loser in this county where Walker is known by letting loose upon him.

Loafaytee Sept 26<sup>th</sup> 1851

Friend Bush.

Per Steamer I send you with this letter three mammoth Peaches from the orchards of Jamus Ramage of North Yarmouth. They are merely above the average of <sup>the</sup> produce of the tree upon which there are some bushes of the same sort. Their aggregate weight is one lb fine or a half. Two of them measure nine inches in diameter each, and the third nine and a half. If anyone can beat that let them speak out.

Enclosed you will find a communication in reference to C. Walker, and treaty matters. There are plenty of good men well sworn to those charges, and as for character there is not a half breed in the country, but what respect and is entitled to more respect than Walker.

You can do as your better judgment dictates. I think I am certain of one thing that you will not be the loser in this county where Walker is known by letting loose upon him

I want you to be certain and save the seeds of those peaches, and either send them to me or keep them until I call for them. Don't forget. Why don't you send me some papers and the names of the owners of the orchards. They are mostly above the average of the produce of the tree upon which there are some bushes of the same sort. Their aggregate weight is one lb fine or a half. Two of them measure nine inches in diameter each, and the third nine and a half. If anyone can beat that let them speak out.

Enclosed you will find a communication in reference to C. Walker, and treaty matters. There are plenty of good men well sworn to those charges, and as for character there is not a half breed in the country, but what respect and is entitled to more respect than Walker. You can do as your better judgment dictates. I think I am certain of one thing that you will not be the loser in this county where Walker is known by letting loose upon him
